Notes: Total federal spending shown here (\$267.063 billion) will differ from total federal outlays shown in fiscal year (FY) 2013 budget documents due to slight differences in the timing of data for the states and the treatment of certain adjustments. Benefits and Administration columns do not sum to Total Medicaid due to the inclusion of VFC in Total Medicaid. Federal spending in the territories is capped; however, they report their total spending regardless of whether they have reached their caps. As a result, federal spending shown here may exceed the amounts actually paid to the territories. State shares for MFCUs and survey and certification are MACPAC estimates based on 75 percent federal match. State-level estimates for these items are available but are not shown here. VFC is authorized in the Medicaid statute but is operated as a separate program; 100 percent federal funding finances the purchase of vaccines for children who are enrolled in Medicaid, uninsured, or privately insured without vaccine coverage. Spending on administration is only for state programs; federal oversight spending is not included. All states had certified their CMS-64 Financial Management Report (FMR) submissions as of February 12, 2014. Figures presented in this table may change if states revise their expenditure data after this date. Zeroes indicate amounts less than \$0.5 million that round to zero. Dashes indicate amounts that are true zeroes.

¹ Amount exceeds the sum of Benefits and State Program Administration columns due to the inclusion of VFC.
